Notes:

(^(*)) Fuel economy & CO₂ data as per ECE R101 / SANS 20101 regulation. Note that the actual fuel consumption will depend on many factors including the driver's driving habits, prevailing conditions and the vehicle's equipment, condition and use.

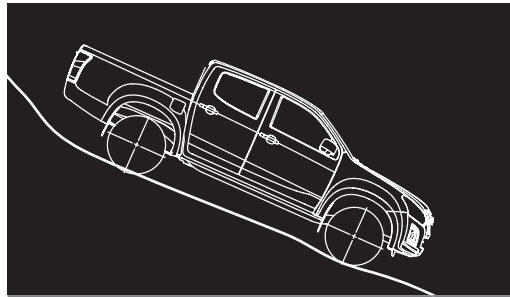

(^(**)) Towing capacity subject to South African Road Traffic Act. The weight of the towing vehicle, including trailer towball load, must not exceed the Gross Vehicle Mass (GVM). The combined weight of the fully loaded vehicle and trailer must not exceed the Gross Combination Mass (GCM). Maximum individual axle loads (GA1 & GA2) must not be exceeded (e.g.: if a 3.0L Diesel is towing 3,500 kg, its maximum Vehicle Mass is 2,500 kg in order to be within GCM).

(^(***)) Low rolling resistance tyres with improved fuel efficiency.

ACTIVE SAFETY FEATURES

The best accident is no accident at all. Isuzu is packed with features that will keep you out of trouble.

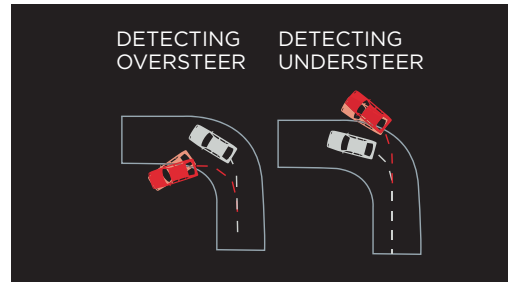

HDC IN FORWARD MOTION

HDC IN REVERSE MOTION

REARVIEW CAMERA

ELECTRONIC STABILITY CONTROL

Emergency Brake Assist

In emergency situations, drivers can often panic when hitting the brakes. EBA detects emergency braking and takes over for you, applying maximum pressure to dramatically reduce stopping distance.

Electronic Brake-Force Distribution

EBD spreads braking power to wheels that need it most, at the front or the rear, based on what you are carrying. When fully loaded, this dramatically reduces your stopping distance.

Traction Control System

If the KB detects any wheel spin, the TCS applies brake pressure to the over-spinning wheels and gives you better control.

Daytime Running Lights

Daytime Running Lights help improve the visibility of your KB to others on the road, even when your headlights are not turned on.

Disclaimer: These features are only available on selected Isuzu models.

Rearview Camera

You'll have eyes in the back of your head with a reversing camera and rear parking sensors available across the range – perfect for tricky parking situations, or reversing out of a narrow driveway.

Hill Descent Control

Hill Descent Control electronically applies brakes to ensure a smooth, controlled descent and will give you the confidence to tackle tricky downhill terrain.

Hill Start Assist

For added driver control and safety, the Electronic Brake Control will automatically engage the Hill Start Assist to prevent vehicle roll-back when starting on steep gradients (above 5.7 degrees).

Electronic Stability Control

The ultimate in active safety. Through a network of sensors throughout the vehicle, ESC can detect if you are over or understeering. It then commands ABS, TCS and the engine management computer to make sure you stay in control. It's like a third hand on the steering wheel, keeping you safe.
