# ENGINEERED FOR FUEL EFFICIENCY

The New Stralis uses FPT Industrial Cursor 8 litre engines with in-line 6 cylinder architecture that produce 352 hp and 1,280 Nm of torque. These engines combine **low fuel consumption with excellent performance** and deliver maximum torque at very low engine speeds (starting from 1,000 rpm to 1,900 rpm). The flexibility resulting from the reduced number of gear changes translates into **higher efficiency and lower fuel consumption**.

All engines are equipped with a decompression engine brake, which ensures additional safety and helps reduce braking system wear and maintenance costs.

EURO III ENGINES	POWER (hp)	TORQUE (Nm)
CURSOR 8 (7.8 litres)	350	1,280
