ABOVE & BEYOND

Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomise the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

RANGE ROVER SPORT

Range Rover Sport is undoubtedly our most dynamic SUV ever. Performance and capability are exceptional, and a range of advanced technologies deliver an assured, confident driving experience. With sportier design cues and a powerful, muscular stance, this is a vehicle designed for impact.

INTRODUCTION

INTRODUCING RANGE ROVER SPORT

A muscular, powerfully planted stance and distinctive rearward sloping roof endow this vehicle with a truly sporting character. A dynamic look completed by the sleek wraparound LED headlights and Animated Directional Indicators.

Exceptional on-road performance and all-terrain capabilities elevate this vehicle into a class of its own. Exuding confidence, its sporty design is complemented by truly responsive driving dynamics and seamlessly integrated technology. With a wide range of engines and a light aluminium monocoque body, it delivers a fast, refined performance.

The efficient Plug-in Hybrid Electric Vehicle (PHEV) adds the benefits of a whisper-quiet electrified powertrain to these capabilities, creating a Range Rover Sport more relevant than ever to motoring today and in the future.

To ensure outstanding performance and great fuel efficiency, our all-new 294kW and 265kW 6-cylinder petrol engines incorporate Mild Hybrid Electric Vehicle (MHEV) technology. This system, along with other measures, also reduces CO₂ emissions and improves driveability.

Whilst the technology, including the Touch Pro Duo infotainment system, 12.3" Interactive Driver Display and full-colour Head-up Display, delivers an even more luxurious and engaging driving experience.

LIGHTING TECHNOLOGY

All-round exterior LED lighting is standard. Designed to last the lifetime of the vehicle, LED lights are more energy efficient and the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring. Innovative Pixel-laser LED headlights provide the ultimate option and give the vehicle even greater presence. See page 43.

SEAMLESSLY INTEGRATED TECHNOLOGY

Touch Pro Duo has two 10" high-definition Touchscreens to ensure you stay connected and entertained. This is complemented by the 12.3" Interactive Driver Display with configurable touch steering wheel controls and our optional second generation full-colour Head-up Display. See page 25.

PERFORMANCE

A range of potent powertrains deliver breathtaking performance. The second generation 5.0 litre V8 Supercharged Petrol engine offers an improved output of 386kW and an even more powerful 423kW in SVR. See pages 66-67.

DRIVING DYNAMICS

The lightweight all-aluminium body helps deliver an unrivalled balance of agility, handling and refinement. A suite of precision-engineered technologies includes Dynamic Response and Electronic Active Differential with Torque Vectoring by Braking. See page 22.

COMPOSED TOWING

A towing capacity of up to 3,500kg, together with a choice of optional towing features - including an electrically deployable tow bar and Advanced Tow Assist - ensure New Range Rover Sport can handle the most demanding tasks. See page 49.

INTERIOR LUXURY

The meticulously designed, contemporary interior comes with enhanced comfort and wellbeing through optional Three-zone Climate Control and Cabin Air Ionisation. Semi-Aniline leather on Autobiography with Dynamic Pack provides even greater levels of luxury. See page 13.

DRIVER-FOCUSED COCKPIT

Designed around the driver, the signature cockpit feel of the front row seating is complemented by a range of intuitively placed features. These include the uncluttered console with SportShift Selector and gearshift paddles on the steering wheel. See page 13.

INTELLIGENT VERSATILITY

Innovative design features include flexible stowage options such as the new additional upper glovebox, the front centre console refrigerator compartment, and a range of charging options including up to five USB ports, four 12V power sockets, and two domestic plug sockets. See pages 44-47.

SUPREME ALL-TERRAIN CAPABILITY

Intelligent AWD systems and a range of standard and optional all-terrain technologies including Electronic Air Suspension, Terrain Response 2 and twin-speed transfer box with electronic centre differential, ensure an exceptional off-road performance. See pages 21-23.

RANGE ROVER SPORT PLUG-IN HYBRID ELECTRIC VEHICLE

Capability, performance and cutting-edge technologies are at the heart of every Land Rover. Taking our vehicles into the future, electric power now propels us into an exciting new era. Our first ever Plug-in Hybrid Electric Vehicle (PHEV), is driven by our most innovative powertrain yet; an advanced Ingenium petrol engine and electric motor combine to give a dynamic and stylish ride with full Range Rover Sport capability¹. With a full electric charge, PHEV is capable of managing most city commutes. Drivers can select from two driving modes to best suit their needs. See pages 14-17 for details.

Parallel Hybrid Mode (The default driving mode) - Combined petrol and electric drive. When in Parallel Hybrid Mode, the driver can optimise battery charge or fuel economy by utilising two alternative charge management functions:

SAVE function - Prevents the battery charge dropping below the level which has been selected

Predictive Energy Optimisation (PEO) function - By entering a destination in the navigation system, the driver enables the feature, which utilises altitude data for the route selected to intelligently switch between the electric motor and petrol engine to maximise fuel economy

EV (Electric Vehicle) Mode - Full electric drive².

In addition to the benefits described above, an increasing number of major cities are introducing vehicle restrictions and charges from which drivers of PHEV vehicles could be exempt.

LOW CO₂ EMISSIONS¹

PHEV's CO₂ emissions make it our lowest emission powertrain yet. See page 14.

¹Please refer to the accompanying Technical Specification for full details on Driveline, Engine Performance and Fuel Economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels. ²Parallel Hybrid Mode will be automatically re-engaged should the driver require more power and torque than is available, or the battery charge drops to an insufficient level to maintain progress.

Rear loadspace capacity is reduced on P400e models, please see page 45 for more detail.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer.

Vehicle shown is Autobiography with Dynamic Pack and Bright Pack in Fuji White with optional features fitted (market dependent).

EV RANGE¹

PHEV is fully capable of managing most city commutes in full Electric Vehicle (EV) Mode¹. See page 14.

EASY OVERNIGHT CHARGING

PHEV can fully charge from a domestic electricity supply in as little as 7.5 hours³, so it's ideally suited to charging at home overnight. See page 14.

CHARGING SOLUTIONS

A full charge can be achieved in as little as 2.75 hours³ at home using the accessory Universal charging cable and 32 amp industrial-type socket, or dedicated wall box. In addition, a range of charging points can be used at offices and other designated public places. See page 14.

REFINED DRIVE

Our quietest Range Rover Sport yet, PHEV delivers a virtually silent drive in full EV Mode. PHEV ensures seamless transition between the petrol engine and electric motor, delivering optimal refinement. See page 15.

NO COMPROMISE ON CAPABILITY AND PERFORMANCE

PHEV is precise and uncompromising. It is fully capable of handling off-road situations such as wading and rock crawl. Its on-road performance is equally remarkable, delivering additional power when you need it most through a combination of electric motor and petrol engine. See page 15.

INCONTROL CONNECTIVITY

With the Protect and Remote Premium features, a range of functions are available through your smartphone device, from enabling the driver to view charge status, to remote operation of the vehicle's climate systems. See page 16.

SEAMLESS DESIGN

Integrating the charging port into the front grille provides easy connection without compromising the vehicle's dynamic design. See page 14.

³Charging times will vary by market, power supply and charging solution. Please refer to landrover.co.za for further information.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

DESIGN

EXTERIOR

Muscular and perfectly proportioned, Range Rover Sport is designed to command attention wherever you take it. With its distinctive silhouette, rearward sloping roof and continuous waistline, Range Rover DNA is unmistakable throughout; its presence more formidable than ever. Every aspect of the vehicle has been designed with precision for immediate impact – its lower, sportier stance is enhanced by the revised front and rear bumpers with integrated exhaust finishers¹.

A cleaner, more dynamic design, there's a contemporary feel everywhere you look, from the Range Rover Sport grille, bonnet vents and fender vents to the refined, yet sporty wheel options such as 22" 9 split-spoke Gloss Dark Grey with contrast Diamond Turned Gloss finish. A dramatic, modern feel is completed by the wraparound LED headlights with front and rear Animated Directional Indicators². This powerful, athletic vehicle is now more compelling than ever.

¹Engine dependent. ²Animated Directional Indicators standard with Matrix LED, Pixel LED and Pixel-laser LED headlights.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

Vehicle shown is Autobiography with Dynamic Pack in Firenze Red with Ebony/Vintage Tan interior with optional features fitted (market dependent).

INTERIOR

Luxurious, supremely comfortable and exceptionally functional, Range Rover Sport is a driver's vehicle through and through. The signature cockpit has been extensively reimagined; every element meticulously designed and beautifully executed. Intuitive controls include the SportShift Selector gear lever, providing the option of manual gear shifting, and flush touch-sensitive steering wheel switches.

The sense of luxury and innovation is reinforced by the revolutionary Touch Pro Duo technology, which incorporates two 10" Touchscreens as standard. The finest materials combine seamlessly with dynamic sports detailing such as the optional Extended Carbon Fibre veneer. The centrepiece is the bold intersection between the sportier horizontal elements of the instrument panel and the vertical lines of the centre console. The overall clean design is complemented by the enhanced optional Configurable Ambient Interior Lighting with a striking graphic light running the length of the console, and the uncluttered feel is maintained by flexible stowage solutions such as the additional upper glovebox.

The distinctive Sports Command Driving Position elevates the driver to provide a heightened sense of confidence and control, giving sweeping views over the road ahead. The seats can be specified in the finest Semi-Aniline leather with a Cut Diamond pattern in contemporary new colourways - including Ebony Vintage Tan and Ebony Eclipse - to ensure this vehicle looks and feels as good as it drives.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.
Interior shown is Autobiography with Dynamic Pack in Ebony/Vintage Tan with optional features fitted (market dependent).

PLUG-IN HYBRID ELECTRIC VEHICLE

Designed and engineered for an increasingly carbon-conscious world, our Plug-in Hybrid Electric Vehicle (PHEV), the P400e, delivers a dynamic driving experience with exceptional Range Rover Sport capability both on and off-road.

P400e uses the combination of an advanced 2.0 litre 221kW Si4 Ingenium Petrol engine supported by a high-capacity 105kW electric motor to deliver a combined output of 297kW. The electric motor can either supply its power in parallel with the engine, or drive the vehicle in the manually selectable Electric Vehicle (EV) Mode. The large 13kWh capacity battery gives the vehicle an all-electric range from a full charge, capable of managing most city commutes¹ with zero tailpipe emissions.

The P400e powertrain has been integrated seamlessly into the vehicle's design. The charging point is discreetly located in the front grille, which makes connection to a power supply both convenient and easy while lending itself to routine overnight home charging.

The battery can be fully charged in as little as 7.5 hours² using the home charging cable, supplied as standard. When rapid charging, a full charge can be achieved in as little as 2.75 hours² at home using a dedicated wall box or 32 amp industrial-type socket, or at a range of public charging points using a public charging cable. For charging away from home, the cable can be stored in the vehicle's loadspace using a purpose-designed storage case and retention system.

¹Please refer to the accompanying Technical Specification for full details on Driveline, Engine Performance and Fuel Economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels.

²Charging times will vary by market, power supply and charging solution.

Please refer to landrover.co.za for further information. Rear loadspace capacity is reduced on P400e models, please see page 45 for more details.

Vehicle shown is Autobiography with Dynamic Pack and Bright Pack in Fuji White with optional features fitted (market dependent).

The P400e delivers an exceptionally refined experience. The electric motor can produce its maximum torque from standstill and delivers a virtually silent drive. If engine torque is required, the system uses the Integrated Starter Generator (ISG) for virtually instant starting, enabling engine torque to be perfectly blended with electric motor torque, smoothly delivering the driver's demand using the hybrid integrated transmission.

Off-road capabilities are uncompromised and in some circumstances, enhanced. Unlike any other plug-in hybrid vehicle, P400e matches the 850mm wading depth³ of a Range Rover Sport fitted with a conventional engine, and the additional torque provided by the electric motor at low speed is an advantage in a variety of off-road situations.

The combination of the instant torque from the electric motor with that from the highly efficient direct injection petrol engine delivers a torque profile normally associated with large capacity petrol or diesel engines, providing exceptional on-road performance¹.

³Wading is only available when engine is engaged.

Vehicles shown are from the Land Rover global range. Specifications, options and availability will vary between markets and should be verified with your local Land Rover Retailer.

PLUG-IN HYBRID ELECTRIC VEHICLE

In Parallel Hybrid Mode (the default driving mode), the electric motor supplies its power in parallel with the engine. There is a seamless transition between the 105kW electric motor and the Si4 Ingenium Petrol engine, as the system smoothly starts the engine and then blends electric motor and petrol engine power together, using the hybrid integrated transmission. Intelligent battery management, which charges the battery through regenerative braking and even when the vehicle is coasting, ensures P400e always has sufficient charge to provide 297kW power output, to deliver seamlessly impressive performance when required.

When in the default driving mode (Parallel Hybrid), the driver can optimise fuel economy or battery charge by utilising one of two alternative charge management functions:

SAVE function - Manually selected through the Touchscreen, SAVE function prevents the battery charge dropping below the level which has been selected. This allows the driver to provision for quiet, zero-emission travel at a later point in the journey. The vehicle will only use the electric motor if the battery has received a charge over and above the saved level through regenerative braking.

Predictive Energy Optimisation (PEO) function - Entering a destination in the vehicle's navigation system will automatically engage the PEO function. By utilising altitude data for the chosen route, PEO intelligently switches between the electric motor and petrol engine to maximise fuel economy throughout the journey.

In addition to operating as a parallel hybrid, the large capacity battery enables the driver to operate the vehicle in **EV (Electric Vehicle) Mode**. Manually selected by a button on the console, EV Mode enables the vehicle to run solely on the electric motor using the energy stored in the battery, the ideal solution for quiet, zero-emission journeys. The system will introduce the petrol engine should the driver require more power than is available through the electric motor alone, or if the battery charge drops to an insufficient level to maintain progress.

Operation of the P400e is further enhanced through specific functionality within Remote Premium (an InControl feature, see page 28). This enables the driver to use a smartphone to view key data such as charge status, as well as operating the climate functions and controlling the charging time.

*Please refer to the accompanying Technical Specification for full details on Driveline, Engine Performance and Fuel Economy.
Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels.

Rear loadspace capacity is reduced on P400e models, please refer to page 45 for more detail.

- 1 105KW ELECTRIC MOTOR**
PHEV features a high-power 105kW permanent magnet synchronous electric motor to deliver power effortlessly.
- 2 INTEGRATED HYBRID AUTOMATIC TRANSMISSION**
A seamless transition from EV to Internal Combustion Engine (ICE) is delivered via the hybrid integrated transmission.
- 3 2.0 LITRE INGENIUM ENGINE**
Developed and engineered by Jaguar Land Rover, our aluminium 2.0 litre 221kW Si4 Ingenium Petrol engine is lighter and more efficient than predecessors.
- 4 13KWH HIGH-VOLTAGE BATTERY**
The large capacity battery gives the vehicle an all-electric range, capable of managing most city commutes* from a full charge.
- 5 7KW ONBOARD CHARGER**
The powerful 7kW onboard charger can deliver a full battery charge in as little as 2.75 hours, dependent on charging station capability.
- 6 INTEGRATED STARTER GENERATOR**
The Integrated Starter Generator (ISG) delivers an exceptionally refined starting of the petrol engine when required.
- 7 REGENERATIVE BRAKING**
Regenerative braking uses the electric motor to harvest kinetic energy whilst braking, converting it to electrical energy that is used to recharge the high-voltage battery.

ENGINES AND TRANSMISSION

From power and sheer driving pleasure to fuel economy and refinement, there is a range of engines available for Range Rover Sport, and each has been optimised for specific attributes to cater for all needs. The 3.0 SDV6 Diesel, 2.0 Si4 Petrol and P400e engines are all equipped with Stop/Start technology. All engines also have smart regenerative charging (except P400e); this feature prioritises the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and reduce fuel consumption for maximum economy, especially during urban driving.

Ingenium technology underpins the 4 and 6-cylinder petrol engines in the Range Rover Sport range. These low-friction, all-aluminium engines have stiff cylinder blocks and twin balancer shafts to ensure inherently low levels of vibration, enabling a smooth and refined driving experience. For engine availability see pages 66-67.

8-SPEED AUTOMATIC TRANSMISSION

All engines in Range Rover Sport are coupled with an 8-speed Automatic Transmission. With eight closely spaced ratios, the transmission ensures that you are always in the optimum gear, maximising fuel efficiency and acceleration. Gear changes are almost imperceptible and shift schedules intelligently adapt to your driving style.

MILD HYBRID ELECTRIC VEHICLE

Land Rover is at the forefront of sustainable innovation. Taking our vehicles into a smarter and more exciting future, Mild Hybrid Electric Vehicle (MHEV) technology is a system that uses a belt-driven starter generator and state-of-the-art 48V battery. These harvest energy that would normally be lost during deceleration, which is then intelligently redeployed.

The stored electricity can be used by the starter generator to provide torque assistance to the engine directly, or to power the electric Supercharger to boost performance before the conventional Turbocharger reaches its maximum output, giving seamless throttle response. This system helps improve fuel economy and boosts the vehicle's performance. The combination of MHEV technology, together with other detailed efficiency improvements, lowers the CO₂ emissions of the Ingenium inline 6-cylinder engines substantially, when compared to the outgoing engine.

The MHEV technology is standard with P360 and P400 engines. Vehicles with the P400 engine also feature Terrain Response with Dynamic Program and Configurable Dynamics, as standard. These features allow personalisation of the vehicle's dynamic settings, complementing the performance characteristics of the engine.

LEGENDARY BREADTH OF CAPABILITY

Range Rover Sport continues to offer outstanding capability on and off-road, with permanent All Wheel Drive (AWD) and Land Rover's revolutionary Terrain Response system fitted as standard - which means this capability can be harnessed by all drivers, expert and inexperienced alike. This extraordinary capability can be extended to suit individual requirements with a range of additional, optional all-terrain technologies.

ELECTRONIC AIR SUSPENSION

A sure-footed, composed drive is completed by the latest Electronic Air Suspension provided as standard, which provides exceptional wheel articulation and poise. It changes the vehicle's height quickly, allowing cross linking of the diagonal wheels to keep all four wheels on the ground on very uneven surfaces. Added to which, it makes loading heavy objects into the boot easier, as you can lower the vehicle's rear suspension height by up to 50mm to suit your needs. These functions can be operated via the 10" Touchscreen, a button in the loadspace area or remotely via the key fob.

The Speed Lowering system uses the Electronic Air Suspension to reduce aerodynamic drag and fuel consumption at cruising speeds, by lowering the vehicle by 15mm from normal ride height when the speed reaches 105km/h.

TWIN-SPEED TRANSFER BOX WITH ELECTRONIC CENTRE DIFFERENTIAL

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing. The optional twin-speed transfer box system gives you precise speed and control in such instances. The heart of the twin-speed system is the electronic centre differential that offers a 50:50 torque split between front and rear axles, with the ability to pre-emptively lock the axles before slip commences.

TERRAIN RESPONSE

When you manually select Land Rover's unique standard Terrain Response system, it sets the vehicle up optimally to match the demands of the terrain, by adapting the responses of the vehicle's engine, gearbox, differentials and chassis systems. There are five manual Terrain Response settings: Comfort, Grass/Gravel/Snow, Mud and Ruts, Sand, and Eco Mode.

TERRAIN RESPONSE 2

Terrain Response 2 is an option that takes the capabilities of the award-winning system to a new level. This features an automatic setting which monitors the current driving conditions and systematically selects the most suitable terrain setting. It also includes additional Rock Crawl Mode. An additional setting is available when **Terrain Response 2 with Dynamic Program** is specified. Dynamic Program tunes the suspension to deliver even tighter body control with flatter handling and sharper responses. You can manually override the system should you wish.

ADAPTIVE DYNAMICS

Adaptive Dynamics¹ makes the miles go by virtually unnoticed. The system monitors vehicle movements up to 500 times a second, reacting to driver or road inputs almost instantaneously, to give greater control and minimise body movement, ensuring a composed, flat ride. The system even senses off-road conditions, and optimises damping accordingly so driver and passengers arrive at their destination refreshed and relaxed.

CONFIGURABLE DYNAMICS

To enhance either refinement and comfort or the vehicle's performance, the Configurable Dynamics² function allows you to configure Range Rover Sport's throttle mapping, gearbox shift points, steering settings and suspension to suit your particular driving needs.

ELECTRONIC ACTIVE DIFFERENTIAL WITH TORQUE VECTORING BY BRAKING

The Torque Vectoring by Braking system³ delivers responsive, controlled cornering and handling through even the tightest of bends. The Electronic Active Differential and the vehicle's braking system constantly balance the distribution of engine torque between the four wheels when cornering.

Exceptional grip and steering confirm Range Rover Sport as our most dynamic SUV.

The system is also active in off-road conditions using the relevant Terrain Response settings. It can be very effective in conditions such as sand, where it helps the vehicle turn in and avoid excessive understeer.

DYNAMIC RESPONSE

Dynamic Response⁴ improves vehicle handling through hydraulic roll control, optimising on-road performance and passenger comfort, by reducing the amount of body lean during cornering. By controlling the front and rear axles independently, it can deliver increased low-speed agility, along with enhanced high-speed stability and greater steering precision.

- 1 SAFETY
- 2 ULTIMATE CAPABILITY
- 3 COMPOSURE

ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC)⁵ is a state-of-the-art system that enables you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including mud, wet grass, ice, snow and dirt roads. Operating like a cruise control system, it functions at low speed between 1.8km/h and 30km/h, enabling you to maintain full concentration on steering and finding a path through obstacles.

LOW TRACTION LAUNCH

Providing you with optimum torque control when you move off from a standstill, low traction launch can be activated from the Touchscreen and enhances capability in slippery conditions like wet grass, snow and ice.

HILL DESCENT CONTROL

Land Rover's patented Hill Descent Control (HDC) is a standard feature. It assists the driver with controlled descents of difficult slopes. It does so by maintaining a constant speed and applying braking separately to each wheel.

WADE SENSING

Unique to Land Rover, this optional system uses ultrasonic sensors in the wing mirrors to visually and audibly alert the driver if the water approaches the vehicle's class-leading wading depth of up to 850mm. It does so by providing real-time pictorial information via the Touchscreen about its depth in relation to the vehicle and its maximum wading capability. Only available with 360° Surround Camera.

⁵Fitted where Terrain Response 2 is specified.

Vehicle shown is Autobiography with Dynamic Pack in Firenze Red with optional features fitted (market dependent).

INFOTAINMENT

Delivering a wealth of information and entertainment, every Range Rover Sport is equipped with our InControl infotainment system, Touch Pro Duo. It features intuitive and advanced integrated technologies to ensure everyone can make the most of their journey.

TOUCH PRO DUO

The standard 10" dual high-definition Touchscreens allow the user to view required information whilst simultaneously being able to interact with additional features, for increased flexibility and efficiency of use. For instance, you can use the navigation system in the upper screen whilst adjusting multimedia settings on the lower. Direct access to cabin and seat temperature controls are also available via the multi-function Dynamic Dials. For a truly elegant and streamlined appearance, the steering wheel also has hidden-until-lit, touch-sensitive switches as standard. One of these switches is programmable, so that it can be personalised to your preferences to accomplish a host of functions.

INTERACTIVE DRIVER DISPLAY

The 12.3" high-definition Interactive Driver Display* can receive and project a vast amount of driving information, entertainment and active safety data including navigation, phone and media. Its high resolution ensures the utmost clarity, and its refined processing engine delivers smooth-moving pin-sharp graphics. Features can be accessed on either the Interactive Driver Display or the Touch Pro Duo Touchscreens.

HEAD-UP DISPLAY

Without distraction or the need for you to take your eyes off the road, Head-up Display* is an option that presents key vehicle data such as your speed, gear position and navigation directions on the windscreen. It features crystal-clear, full-colour graphics in high resolution, enabling you to see all driver inputs and information with ease, including phone/call status. The feature can be turned on and off dependent on driver preference.

REAR SEAT ENTERTAINMENT

The optional Rear Seat Entertainment system provides two 8" screens built into the rear of the front headrests or two 10" high-definition seat mounted articulating Touchscreens. It includes 'Journey Status', a navigation summary screen which displays a pop-up for the rear occupant detailing the time and distance to destination. Both systems come with a pair of WhiteFire® digital wireless headphones and HDMI, Mobile High-definition Link (MHL), CD/DVD player and USB connections. Passengers can also enjoy their favourite TV shows via the optional Digital TV feature.

*For optimal performance, solar attenuating glass may be required. Please consult your Land Rover Retailer for further information.

WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under licence.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

Vehicles shown are from the Land Rover global range. Specifications, options and availability will vary between markets and should be verified with your local Land Rover Retailer.

CONNECTIVITY

InControl is Land Rover's suite of standard features that connects you to your vehicle and links you seamlessly, and securely, with the outside world. With a selection of apps, even when you're away from your vehicle some of the InControl features stay with you, making sure the Land Rover experience is more enjoyable than ever.

STANDARD FEATURES

VOICE RECOGNITION SYSTEM

So you can complete tasks without taking your eyes off the road, Range Rover Sport offers intelligent voice recognition. For example, 'tune to 97.9' or 'call home'.

PROTECT*

Land Rover Optimised Assistance - If you break down you can make a direct call to the Land Rover Assistance team by pressing the button on the overhead console, or from the Assistance screen within the Premium smartphone app.

SOS Emergency Call - In a more serious incident, SOS Emergency Call will automatically connect you to the emergency response team who will notify the emergency services to your location. For peace of mind, this service is provided for the first 10 years from date of registration.

Journey Tracking - This opt-in feature can automatically record your journey history including your route and mileage statistics. This information can be exported by email to use for expense reporting and can be imported to a spreadsheet.

Vehicle Status Check - Use your smartphone to remotely check current range levels, and status of door and window position and locks. See the last parked location of the vehicle and find your way back to it with on-foot directions.

NAVIGATION PRO

Navigation Pro allows you to save your favourite places, use swipe and pinch-to-zoom gestures for simple map exploration and can display a choice of either 2D or 3D crystal-clear map graphics. Navigation Pro functionality is further enhanced by Connect Pro.

CONNECT PRO*

Connect Pro consists of Remote Premium and Pro Services with 4G Wi-Fi Hotspot, and is designed to enhance your in-car and out-of-car experience, ensuring you and your passengers enjoy the journey whilst remaining connected to the world.

Pro Services include:

- **Real Time Traffic Information** - Uses live traffic data feeds to give you the most accurate picture of what the traffic is like on the way to your destination.
- **Online Search** - Wherever you are, you can search the surrounding area for places of interest. The system can access expert destination information, travel tips and inspiration, as well as online travel reviews of the local area.
- **Planning Routes and Door-to-Door Routing** - Before setting off, use the optional Route Planner app or go online to search, save locations or set your destination. The app uses the Cloud to send your destination automatically to your vehicle's navigation screen. Once you've parked, the Route Planner app will guide you to your destination - a true door-to-door experience which includes public transport options.

*Protect and Connect Pro require a SIM with a suitable data contract. Online functionality and Wi-Fi connectivity is dependent on the installation of a micro SIM with a suitable data contract. Protect and Remote Premium contains subscription services that can be extended after the initial term advised by your Land Rover Retailer. InControl features, options and their availability remain market dependent - check with your Land Rover Retailer for local market availability and full terms.

Information and images displayed in relation to the InControl technology, including screens or sequences, are subject to software updates, version control and other system/visual changes depending on options selected. Mobile network connectivity cannot be guaranteed in all locations. All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

- **Share ETA** - You can share your estimated time of arrival so your selected contact(s) will know exactly when you will arrive, as calculated by the navigation guidance system. If you're running late, Share ETA can then send automatic updates via text messages or email, without any further action from you.
- **Satellite View** - When you want to get the context of your surroundings from overhead, simply switch to satellite view.
- **Fuel Prices** - When you're going to fill up, the Fuel Price service not only finds filling stations along your route, it also enables you to compare fuel prices so you can keep your costs down.
- **Commute Mode** - Allows the system to learn your commutes and automatically advises you of the expected journey time based on live and historical traffic movements, without you having to input a destination. The system learns the routes you take for a given destination and then advises which of those is the quickest. The feature can be turned on and off dependent on driver preference.
- **Parking Service** - As you approach your destination, you can see where parking is available. Simply tap on your preferred car park and the navigation system updates to direct you to it.
- **Online Routing** - While you're on your way to a destination, the system monitors live traffic conditions and takes into account typical traffic patterns for that time of day, keeping you on the optimum route.
- **Safety Cameras** - Alerts you to the location of accident black spots monitored by safety cameras.
- **Online Media** - Allows for the aggregation of numerous content providers and their personalised content - such as Deezer and TuneIn - that gives access to more than 40 million music tracks and four million on-demand programmes and podcasts. For the first time, these can be directly streamed from the vehicle without the need for a smartphone - providing a seamless and integrated experience.

REMOTE PREMIUM*

Remote Premium provides information on your vehicle and enables you to interact with it remotely. Compatible with most smartphones, Android Wear™ or Apple Watch®, this service includes:

- **Remote Lock/Unlock** - Lock or unlock your doors remotely with the click of a button. Simply press the 'lock' button on the Vehicle Security screen of the Remote Premium smartphone app to single lock the doors, arm the alarm, fold in the wing mirrors and close the windows. Press the 'unlock' button to unfold the wing mirrors, turn on the dipped headlights and cause the hazard lights to flash twice.
- **Beep/Flash** - This feature turns on your Land Rover's hazard lights and dipped headlights, and sounds an audible alert to help you locate your vehicle in a crowded car park.

REMOTE PREMIUM - PHEV ENHANCEMENTS

Charging Status Information - Stay continually updated with key battery function indicators including charge state, charging status, charge rate, plug state and estimated EV range.

Remote Control Actions - Use your smartphone to remotely start and stop charging, manage charging tariffs and even set the maximum state of charge.

SMARTPHONE PACK

By screen sharing with Range Rover Sport's InControl infotainment system, the Smartphone Pack helps you stay safely connected to your smartphone even while in the car. Applications include:

- **Apple CarPlay®** is also designed for increased safety, enabling the use of apps while allowing the driver to concentrate on the road ahead. Connect your Apple smartphone to your car to use compatible apps such as maps, messages and music through the Touchscreen.

*Remote Premium contains subscription services that can be extended after the initial term advised by your Land Rover Retailer. InControl features, options and their availability remain market dependent - check with your Land Rover Retailer for local market availability and full terms. Information and images displayed in relation to the InControl technology, including screens or sequences, are subject to software updates, version control and other system/visual changes depending on options selected. Mobile network connectivity cannot be guaranteed in all locations. Remote App will need to be downloaded from the Apple/Play Store. All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under licence. Apple Watch® and Apple CarPlay® are registered trademarks of Apple Inc., registered in the US and other countries. iPhone® is a registered trademark of Apple Inc., registered in the US and other countries. Please ensure iPhone compatibility is reviewed with your local Land Rover Retailer.

AUDIO

A vehicle's cabin is the ideal place within which to experience your personal choice of music, and Range Rover Sport has the option of four different audio systems to bring your music to life:

Meridian™ Signature Sound System with 22 speakers and a dual-channel subwoofer.

ENHANCED SOUND SYSTEM

Outstanding acoustic range through eight speakers.

MERIDIAN™ SOUND SYSTEM

Great definition, crystal-clear highs and full, deep bass – delivered through the careful arrangement of 12 speakers and a dual-channel subwoofer.

MERIDIAN SURROUND SOUND SYSTEM

All the fullness and clarity of a live performance delivered through an arrangement of 18 speakers and a dual-channel subwoofer – seamlessly brought together using Trifield™ technology. Exclusive to Meridian, Trifield perfectly blends the centre and surround channels with left and right channels ensuring an optimum, consistent sound experience for each passenger.

MERIDIAN SIGNATURE SOUND SYSTEM

This delivers truly life-like reproduction, creating a profound, personal sound experience for every seat. World-first Trifield 3D technology takes surround sound to the next level – the Signature Sound System includes 22 speakers and a dual-channel subwoofer. Incredibly authentic, the sense of cabin space is expanded to a 3D experience – rendering all the instruments, performers and venues of your favourite performances in true scale and location.

MERIDIAN™

Formed in 1977 in Cambridgeshire, England, Land Rover’s audio partner Meridian has pioneered many firsts, including active speakers and the world’s first digital surround sound processor.

Meridian’s audio technology input has helped ensure that Range Rover Sport is the most superb space within which to experience sound. Meridian Cabin Correction technology was utilised to analyse cabin shape, acoustics and resonance characteristics in order to help remove unwanted sounds.

The advanced algorithm ensures that the rhythm, punch and timing of any piece of music are heard precisely how the artist intended, providing a consistently exceptional quality audio experience for all passengers in the vehicle.

MERIDIAN™ SOUND	  	13	380
MERIDIAN™ SURROUND SOUND	   	19	825
MERIDIAN™ SIGNATURE SOUND	   	23	1700

Meridian is a registered trademark of Meridian Audio Ltd.
Trifield and the three fields device is a trademark of Trifield Productions Ltd.
Features and their availability may differ by vehicle specification and market.

DIGITAL SIGNAL PROCESSING
Brings all elements of the audio system together as one, for performance that would otherwise require significantly larger speakers.

MERIDIAN CABIN CORRECTION
The advanced algorithm of Meridian’s Cabin Correction tailors the sound experience to the precise acoustics of Range Rover Sport’s interior.

MERIDIAN DIGITAL DITHER SHAPING
To maintain the quality of musical recordings, they are converted into a common digital format. Meridian Digital Dither Shaping ensures that digital signal conversions are made smoothly and seamlessly, preserving the finest details of the audio performance. The result is authentic musical conversion, evoking the emotions of the original recording.

TRIFIELD™
Exclusive to Meridian, Trifield blends the centre and surround channels seamlessly with left and right, delivering a consistent, concert-like experience for all occupants.

TRIFIELD 3D
Building on Meridian’s proven Trifield surround sound technology, world-first in-car Trifield 3D truly brings musical performances to life. Through the addition of dedicated height channels, the sense of cabin space is expanded to a 3D experience, for a supreme sense of scale and definition to your music.

DRIVER ASSISTANCE

MAKING DRIVING EASIER

From negotiating city traffic or the motorway, to providing additional safety for you and your passengers, there's a wealth of innovative technologies available; either as standard, optional or as part of an optional pack. Whichever you choose, you'll find every single feature has been designed and engineered to heighten your enjoyment of the vehicle.

STANDARD DRIVE FEATURES

Lane Departure Warning

- **Cruise Control and Speed Limiter** allows the driver to maintain the current speed of the vehicle without the need for continued use of the accelerator pedal, helping to reduce driver fatigue. The Speed Limiter will also allow the driver to preset a maximum specified speed that the vehicle will not exceed. Both functions can be easily turned on or off by the driver as desired.
- **Lane Departure Warning** can help make long journeys much safer. The system senses when your vehicle is unintentionally drifting out of your lane, and notifies you with a visual alert and a gentle vibration of the steering wheel.

OPTIONAL DRIVE FEATURES

Adaptive Cruise Control

- **Adaptive Cruise Control** will keep your vehicle a safe distance from the one in front, should it slow or stop when you're cruising on the motorway or travelling in slow-moving traffic. Should the vehicle in front stop completely, your vehicle will come to a smooth halt. In stop-start traffic, Adaptive Cruise Control will automatically resume following the car in front. The system can be activated from 20km/h and once activated will operate between 0-200km/h.
- **High-speed Emergency Braking** detects when a potential frontal collision with another vehicle may occur and displays a forward alert to warn the driver to brake. If the driver doesn't react, the vehicle will deploy the brakes in order to reduce the severity of the possible impact. High-speed Emergency Braking is ready and active from 10km/h to 160km/h.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

Features and their availability may differ by vehicle specification and market. Please refer to Specification and Price Guide for details or contact your local Land Rover Retailer for more information.

OPTIONAL DRIVE PACKS

DRIVE PACK

Blind Spot Monitor

The optional Drive Pack offers a range of features that help keep you safe and informed. The Drive Pack includes:

- **Driver Condition Monitor** detects if you're starting to feel drowsy and gives you an early warning when you need to take a break.
- **Blind Spot Monitor** alerts you to vehicles in, or quickly approaching, your blind spot. When a vehicle is detected, a small warning light will illuminate in the corresponding wing mirror. If you indicate in the direction of the obstacle, the warning light will flash to highlight potential danger.

DRIVE PRO PACK

Lane Keep Assist

For an even more relaxed drive, the optional Drive Pro Pack contains a wide range of driver assistance features including the Driver Condition Monitor in the Drive Pack, plus:

- **Lane Keep Assist** detects when your vehicle is unintentionally drifting out of your lane, and gently applies a corrective torque to the steering wheel, encouraging you to guide your vehicle back.
- **Blind Spot Assist** can help prevent collisions. If your vehicle detects another car in your blind spot when you begin to change lanes, a small warning light illuminates in the corresponding wing mirror and a steering torque encourages you to guide your vehicle away from the approaching vehicle.
- **Adaptive Cruise Control** - See page 32.
- **High-speed Emergency Braking** - See page 32 for description.

ENJOY STRESS-FREE PARKING

Range Rover Sport offers the most advanced technologies to deliver intuitive and easy parking solutions. Whether reversing, parallel parking or getting into or out of tight spaces, these features make life easier. Available as standard, optional or as part of an optional pack.

STANDARD PARK FEATURES

Front and Rear Parking Aid

- **Front and Rear Parking Aid** helps make manoeuvring even easier. When you select Reverse, or choose to activate them manually, sensors located in the front and rear bumpers are triggered. As you park, the Touchscreen display and audio feedback indicate how close you are to obstacles.

OPTIONAL PARK FEATURES

360° Surround Camera

- **Rear Camera*** provides improved visibility when reversing. Static lines representing the vehicle's outer perimeter and predicted path are superimposed on the rearward image, to make parking in tight spots as easy as possible. This valuable parking aid also helps when hitching a trailer.
- **360° Surround Camera** uses four digital cameras discretely placed around the vehicle, providing a 360° overhead view on the Touchscreen. With the capacity to display several different views at the same time, this helps with various manoeuvres from parking by a kerb, to getting in and out of tight spaces and junctions.

*Optional on S models.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

OPTIONAL PARK PACKS

PARK PACK

360° Parking Aid

The optional Park Pack assists you with manoeuvring in tight spaces and in urban environments, it features:

- **360° Parking Aid** gives you complete confidence when manoeuvring in tight spaces. Sensors located around the vehicle are automatically triggered when Reverse is selected, or can be manually activated, with a graphic appearing on the Touchscreen showing an overhead view of the vehicle. As you park, the Touchscreen display and audio feedback indicate how close you are to obstacles.
- **Rear Traffic Monitor** is particularly useful when reversing out of a parking bay. The system warns you of vehicles, pedestrians or other hazards approaching from either side of your vehicle. It will alert you with both audio and visual warnings, so you know what's behind you even when the view is obstructed.
- **Clear Exit Monitor** alerts rear passengers to any approaching cars, cyclists or other hazards before they leave the vehicle. As the rear seat passenger pulls the door handle to leave your vehicle, a warning light will flash on the rear door if an incoming obstacle is detected.

PARK PRO PACK

Park Assist

The optional Park Pro Pack enables you to park and manoeuvre safely and securely in and out of tight spaces, and into traffic that is obscured by buildings or other vehicles. It includes the 360° Parking Aid, Rear Traffic Monitor and Clear Exit Monitor in the Park Pack, plus:

- **Park Assist** makes parallel and perpendicular parking easier than ever, by steering your vehicle into a suitable space. You just have to select the appropriate gear and control the vehicle's speed with the brake and accelerator pedals. Graphics and notifications guide you through the manoeuvres. Park Assist will also steer you out of a space, taking all of the stress out of parking.

DRIVER ASSIST PACK

The optional Driver Assist Pack offers a wide range of driver aids including the features found in the Drive Pro Pack (see page 33), the Park Pro Pack (see page 33) and the 360° Surround Camera. It also includes Adaptive Cruise Control with Steering Assist. This latest technology makes motorway driving and heavy traffic situations even easier and more comfortable. It achieves this by gently assisting steering, acceleration and braking to centre the vehicle in lane while maintaining a set distance from vehicles ahead. Moderate steering interventions ensure that the physical effort of maintaining a central vehicle position is reduced.

FRONT CAMERA

FRONT RADAR

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

Features and their availability may differ by vehicle specification and market. Please refer to Specification and Price Guide for details or contact your nearest Jaguar Retailer for more information.

Vehicle shown is Autobiography with Dynamic Pack in Firenze Red with Ebony/Vintage Tan interior with optional features fitted (market dependent).

ADAPTIVE CRUISE CONTROL WITH STEERING ASSIST

Adaptive Cruise Control with Steering Assist can be activated from 15km/h, and once activated will operate between 0-180km/h. It begins functioning when you depress the 'Set' cruise button. A camera and radar then work together to track lanes ahead to maintain a central position for your vehicle, and moderate its speed according to the behaviour of the traffic ahead of you. If the vehicle ahead slows, even to a standstill, the feature automatically slows your vehicle, bringing it to a stop where necessary, to maintain a relaxed and composed drive in busy traffic situations.

Adaptive Cruise Control with Steering Assist works with you; as you keep your hands on the wheel anticipating the road ahead, the system assists with steering, braking and acceleration. Should you remove your hands from the wheel, the vehicle will provide a warning. If the warning is not heeded then the Steering Assist is deactivated, but the Adaptive Cruise Control remains active.

EFFICIENT TECHNOLOGIES

SUSTAINABLE BY DESIGN

Land Rover are committed to producing vehicles that use more sustainable materials, produce less waste and use fewer natural resources as part of our approach to sustainable business. Range Rover Sport's development process has included a full life-cycle assessment and has been designed to be 85 percent recyclable/reusable and 95 percent recoverable at the end of the vehicle's life.

Our innovative design enables the use of a unique alloy in the vehicle body, made from up to 50 percent recycled aluminium derived from our closed-loop manufacturing process, retaining quality and performance but delivering lower life cycle CO₂ emissions. Closed-loop manufacturing means taking the scrap from the body pressings process, segregating it and re-melting it back into quality sheet aluminium at our supplier, to be used again to press out body panels, thereby reducing the need to use primary aluminium.

ENGINE MANUFACTURING CENTRE

Jaguar Land Rover's Engine Manufacturing Centre, where our Ingenium engines are assembled, has been built to the highest environmental standard (BREEAM Excellent) and features one of the largest rooftop solar panel installations in the UK. Comprising no fewer than 22,600 individual panels, with 6.2MW generating capacity, the panels have the capability to provide up to 30 percent of the site's energy needs.

ECO MODE

Eco mode ensures the vehicle runs more efficiently and economically by using software to implement a range of actions, from softening the pedal on throttle and gear changes, to retuning the heating, ventilation and air conditioning when in Auto Mode and switching off heated door mirrors.

LOW CO₂ TECHNOLOGIES

Range Rover Sport powertrains incorporate a variety of low CO₂ technologies. Our intelligent Stop/Start system* is designed to improve fuel efficiency and reduce emissions. Mild Hybrid Electric Vehicle (MHEV) - considered the next generation of Stop/Start technology - takes this even further. Our latest Plug-in Hybrid Electric Vehicle (PHEV) ensures both optimum performance and efficiency.

*Market dependent.

SAFETY

SAFE AND SECURE

With its strong, powerful stature, Range Rover Sport provides a high degree of protection. Its all-aluminium monocoque body makes it one of the strongest vehicles of its kind. The inclusion of high-strength aluminium in the body structure ensures minimum intrusion into the safety cell in the event of a collision, while the elevated Sports Command Driving Position provides enhanced visibility in all conditions. You can see more of the road and be easily seen by other road users, providing an enhanced feeling of safety and confidence.

It has also been engineered to include a wealth of standard features, not only to protect you and your passengers, but to actively help prevent accidents occurring:

Dynamic Stability Control (DSC) monitors Range Rover Sport's dynamic behaviour, intervening to maximise vehicle stability. DSC reduces engine torque and applies braking to the appropriate wheels, to correct the vehicle's direction of travel by counteracting understeer or oversteer.

Anti-lock Braking System (ABS) allows the vehicle to maintain traction with the road surface whilst braking and prevents wheels from locking - thereby retaining the vehicle's ability to steer. The system helps to shorten the braking distance.

Electronic Brake-force Distribution (EBD) automatically varies the braking force to each axle in order to minimise stopping distance, while still maintaining stability and the vehicle's ability to steer.

Electronic Traction Control (ETC) optimises traction and stability by controlling wheel spin. The ETC system reduces torque to the spinning wheel, then applies braking to the wheel, if required.

Cornering Brake Control (CBC) automatically varies the braking force to each wheel when the vehicle's brakes are applied around a corner and the limit of grip is reached. The system will prevent the vehicle's wheels from locking up and skidding in this event, through varying the braking force applied to each wheel.

Roll Stability Control (RSC) is integrated with DSC to reduce the possibility of rollover, while providing agility and ability to steer around obstacles. It monitors the vehicle motion and cornering forces to detect any potential risk of rollover. When risk is detected, braking is applied to the outside front wheel to reduce forces that contribute to rollover.

Emergency Brake Assist (EBA) understands when you apply the brakes quickly but without the necessary force to maximise stopping performance. It therefore boosts the brake pressure through the ABS pump to ensure you stop in time.

Hazard Lights Under Braking - To help reduce the risk of a collision, the Emergency Stop Signal system automatically activates the hazard warning lights during emergency braking.

To improve safety further for all the family, two ISOFIX points for baby/child seat restraints are fitted on each side of the rear seats, and additional protection is offered by seat belt pretensioners which, in the event of a front impact, reduce forward movement. To further protect you, there is a comprehensive system of airbags including driver and passenger airbags, side curtain and thorax.

LIGHTING TECHNOLOGY

Range Rover Sport features all-round exterior LED lighting with standard features including signature Daytime Running Lights, automatic headlights and power wash. LED lights are designed to last the lifetime of the vehicle and are more energy efficient. Also, the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring.

A range of beam pattern assistance features provide maximum light while minimising the impact on other road users. The standard Premium LED headlights can be enhanced by the optional Auto High Beam Assist, which turns on the main beam and dips it when other road users are detected.

Optional Matrix LED headlights and Pixel LED headlights both feature an Adaptive Front-lighting System (AFS) and also enable Advanced Driving Beam (ADB). The AFS optimises the lighting beam to suit a range of driving conditions: town, country, motorway and bad weather, while the ADB allows you to use both the high and low beam concurrently. By splitting the main beam into vertical strips, the Matrix LED headlights can cast four vertical shadows in front of a vehicle ahead, to prevent dazzling without having to dip the main beam and lose the illumination. The Matrix LED headlights also feature front and rear Animated Directional Indicators which illuminate with a distinctive sweeping pattern.

Optional Pixel LED headlights, with nearly three times as many LEDs than the Matrix headlights, offer our most advanced headlight technology and build on the ADB capability to ensure maximum light. By splitting the main beam pattern vertically and horizontally, they enable up to four higher definition shadows, to avoid dazzling multiple vehicles ahead. This headlight option incorporates bending lights which operate at higher speeds to direct the main beam pattern according to the direction of steering.

Optional Pixel-laser LED headlights build on the Pixel LED headlight option with the addition of laser technology. The long-range laser delivers five times higher luminance than standard LED lights, and is particularly useful for long, straight road driving. They become operational above 80km/h and when no other external lights are detected, to produce clear sight for over half a kilometre.

VERSATILITY

AUTOMATIC ACCESS HEIGHT 50MM

TRULY FLEXIBLE

AUTOMATIC ACCESS HEIGHT

Range Rover Sport has the versatility to meet all your needs. While the exemplary levels of comfort are complemented by a range of innovative features which add to the convenience, luxury and ease of every journey.

Automatic Access Height, as part of the Electronic Air Suspension, allows you to get in and out of the vehicle with greater ease and elegance as, when activated, this feature lowers the vehicle by as much as 50mm when the vehicle comes to a halt and the door is opened. Optional as part of the Park Pack, Clear Exit Monitor provides an alert to rear seat passengers prior to them leaving the vehicle, to prevent the door opening onto approaching obstacles. The vehicle is also available with optional soft door close to provide power latching on the front and rear doors.

*Standard when panoramic roof is specified.

Features and their availability may vary by vehicle specification and market. Please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer for more information.

INTERIOR CLIMATE

To prevent the cabin from overheating in the sun and minimise demands on the air conditioning, the **auto sunblind*** closes automatically when passengers have disembarked and the doors locked. When the vehicle is re-opened, the sunblind returns to the position prior to it auto-closing.

The optional Cabin Air Ionisation with Nanoe™ technology improves the air quality within the vehicle cabin and reduces allergens, viruses, airborne bacteria and associated odours. It does so by ionising particles in the air, making them attract to surfaces and thus helping to cleanse the air. Optional Three-zone Climate Control helps make life more comfortable for everyone, utilising a fully independent rear heating and air conditioning unit to ensure all occupants enjoy optimum comfort.

LOADSPACE

Range Rover Sport has a generous 780 litres of available loadspace or up to 1,686 litres when the rear seats are stored flat. All models come with a 60:40 split second row seat as standard, with an optional load through feature (ideal for long items such as skis).

Dry: Volume as measured with VDA-compliant solid blocks (200mm x 50mm x 100mm).
Wet: Volume as measured by simulating the loadspace filled with liquid.

On P400e variants, the loadspace capacity is reduced by 79 litres and the loadspace floor is raised by 46mm. Please contact your local Land Rover Retailer for more information.

Nanoe™ is a trademark of Panasonic Corporation.

BUSINESS

POWER AND STOWAGE

With a flexible and contemporary interior, Range Rover Sport is designed to enhance your business activities.

With **two optional mains voltage outlets** and **five USB ports** located throughout the cabin, multiple electronic devices can be charged on the go. And to ensure your cabin is clutter-free, there is increased stowage space, from a recess specifically for smartphones to the upper glovebox and deep stowage compartments.

The optional **front centre console refrigerator compartment** provides the luxury of cooling drinks on demand. It can accommodate up to four 500ml bottles and maintain them at a temperature of 5°C, with the ability to achieve -5°C degrees for short periods to deliver rapid cooling. A border light indicates when it has been switched on.

LEISURE

ACTIVITY KEY

With the optional **Activity Key**, you can enjoy your favourite activities and keep your vehicle key securely in the vehicle. For extra convenience, you can strap the Activity Key to your wrist. The wristband is robust and fully waterproof, allowing you to take part in a range of activities from cycling to swimming. Simply touch your Activity Key on the tailgate (behind the letter R in the Range Rover script) to lock or unlock the vehicle and deactivate or reactivate the conventional key fob.

TAILGATE

Access to the considerable rear space is now more convenient than ever. **Rear Height Adjust** lowers the rear suspension by up to 50mm when the tailgate is opened. This creates a more natural ramp angle, with the lowered rear improving both loadspace accessibility and ease of loading. The optional **powered gesture tailgate** allows you to open and close the tailgate from the kerb without needing to touch either the vehicle or the key fob. And as the system is compatible with optional towing solutions, you can still tackle demanding situations with the least amount of fuss.

TOWING

With a towing capacity of up to 3,500kg¹ and by incorporating tailored technologies, Range Rover Sport can handle the most demanding of tasks.

ELECTRICALLY DEPLOYABLE TOW BAR²

This optional system is deployed using a convenient button in the loadspace compartment, or via the Touchscreen.

TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualise the hitching process; it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen.

REAR HEIGHT ADJUST

Rear Height Adjust allows the use of switches in the loadspace or on the key fob to lower the rear suspension height by up to 50mm - useful when loading or unloading cumbersome items, or when hitching, unhitching or loading a trailer.

TOW ASSIST

Tow Assist helps with reversing by predicting the trailer's direction. The system displays the predicted path of both the vehicle and the trailer as coloured trajectory lines on the Touchscreen. For precise guidelines you can even choose your trailer's width. Standard with 360° Surround Camera.

ADVANCED TOW ASSIST

Advanced Tow Assist allows you to control the direction of your trailer when reversing by using the rotary Terrain Response 2 controller. The optional system will control the vehicle's steering to achieve the desired trailer trajectory.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) gives you greater stability when towing. Should TSA detect a dangerous trailer sway situation is developing, it can help you regain control by gradually reducing Range Rover Sport's speed, through lowering engine power and applying the brakes individually on each side of the vehicle to control the sway.

¹2,500kg limit on P400e models. 3,000kg limit on SVR models and Si4 models.

²Electrically deployable tow bar is not available for P400e. Alternatively, fixed multi-height tow bar can be fitted as a Retailer-fit accessory.

Vehicle shown is Autobiography with Dynamic Pack in Firenze Red with optional features fitted (market dependent).

RANGE ROVER SPORT SVR

SPECIAL VEHICLE OPERATIONS

Designed and engineered by Special Vehicle Operations (SVO) – Land Rover's Centre of Excellence for bespoke commissions, luxury editions and performance models – Range Rover Sport SVR is our fastest and most capable performance SUV ever. With a bold, assertive design and an even more exhilarating performance, SVR stirs the emotions like no other Land Rover.

PERFORMANCE AND DESIGN

The 5.0 litre V8 Supercharged Petrol 423kW engine delivers a powerful 700Nm of torque, taking it from 0-100km/h in 4.5 seconds and to a top speed of 283km/h. SVR Dynamic Response is enhanced so that the vehicle corners flatter and faster than any other Land Rover, whilst SVR Sport Suspension is optimised for performance and delivers improved handling. The integrated quad tailpipes with Active Exhaust provide its distinctively throaty engine sound. And with mud and snow tyres available on 22" wheels, this vehicle now delivers breathtaking SVR performance in the most challenging conditions.

SVR's all-round enhanced capability is accentuated by the broad shouldered, muscular stance. A look that is complemented by a unique mesh grille and side fender vents in Narvik Black. Design is purposeful with features optimising both form and function. Engine cooling and airflow to the brakes is maximised by the enhanced front bumper.

The bonnet can also be specified in an optional striking exposed Carbon Fibre which dramatically enhances SVR's sporting character.

A range of options offer a high degree of personalisation, including 22" lightweight SVR alloy wheels and brake calipers in Red or Gloss Black. An even sportier look is achieved when you choose the exposed Carbon Fibre bonnet with the optional Carbon Fibre Pack. This is further enhanced by the optional SVR Carbon Fibre engine cover, which provides the benefit of being lightweight and adds a premium finish to the engine compartment.

Vehicle shown is SVR in Velocity Blue with optional features fitted (market dependent).

INTERIOR

Land Rover's fastest SUV takes driver and passenger comfort to the very highest levels.

Providing a supreme degree of comfort and control, the lightweight SVR Performance seats in Windsor leather are heated as standard and offer cooling as an option. These sleeker seats are available in four colourways and Cut Diamond perforation styling.

This vehicle is unmistakably SVR. The unique, sportier steering wheel has a trim matched to the interior colourway with SVR branding. The SVR logo is also embossed on the headrest and highlighted on the fascia centre panel. More dynamic touches are delivered throughout with the use of premium finishers, including Satin Brushed Aluminium and Grand Black. Further refinements are available, including the Gloss Carbon Fibre trim finisher with a Gloss Carbon Fibre lower finisher on the steering wheel.

SPECIFICATIONS

CHOOSE YOUR MODEL

Each model has a choice of engines and unique features. This guide will help you to select your ideal Range Rover Sport. On the following pages you will see the standard features for each model: S, SE, HSE, HSE with Dynamic Pack, Autobiography with Dynamic Pack and SVR.

To find out more and see your model specification, configure your Range Rover Sport at landrover.co.za

STANDARD FEATURES FOR ALL MODELS

DYNAMICS

- Electronic Air Suspension
- 8-speed Automatic Transmission
- All Wheel Drive (AWD)
- Electric Power Assisted Steering (EPAS)
- Dynamic Stability Control (DSC)
- Eco Mode
- Low traction launch
- Electronic Traction Control (ETC)
- Roll Stability Control (RSC)
- Cornering Brake Control (CBC)
- Hill Descent Control (HDC)
- Electric Parking Brake (EPB)
- Electronic Brake-force Distribution (EBD)
- Gradient Acceleration Control (GAC)
- Gradient Release Control (GRC).

EXTERIOR FEATURES

- Roof rack mounting provisions
- Heated rear window
- Acoustic laminated windscreen
- Rain sensing windscreen wipers.

EXTERIOR LIGHTING

- Automatic headlights
- Daytime Running Lights (DRL)
- LED tail lights
- Follow me home lighting
- Centre high-mounted stop light
- Rear fog lights
- Headlight power wash.

WHEELS AND TYRES

- Tyre Pressure Monitoring System (TPMS).

TOWING

- Trailer Stability Assist (TSA)
- Electrical towing preparation
- Front and rear recovery eyes.

INTERIOR FEATURES

- Multi-function steering wheel
- Sunvisors with illuminated vanity mirrors
- Electric windows with one-touch open/close and anti-trap
- Lockable upper and lower fascia glovebox
- Front and rear cup holders
- Front and rear grab handles
- Driver footrest
- Front door storage space.

CONVENIENCE

- Push Button Start
- Centre console with armrest
- Rear centre armrest
- Loadspace light
- Loadspace mounting provisions
- 60:40 split second row seats.

INFOTAINMENT

- Touch Pro Duo
- 12.3" Interactive Driver Display
- Navigation Pro
- Protect
- Pro Services and 4G Wi-Fi Hotspot
- Remote Premium

- Voice control
- Power sockets
- All Terrain Info Centre
- Bluetooth® connectivity.

DRIVER ASSISTANCE

- Lane Departure Warning
- Cruise Control and Speed Limiter
- Front and Rear Parking Aid.

SAFETY

- Anti-lock Braking System (ABS)
- Emergency Brake Assist
- Hazard lights under braking
- Intrusion sensor
- Customer configurable autolock
- Height adjustable seat belts
- Customer configurable single point entry
- Power operated child locks
- Rear ISOFIX on outer seats
- Front airbags, with passenger seat occupant detector
- Seat belt pretensioners.

CHOOSE YOUR ENGINE

WHICH ENGINE IS RIGHT FOR YOU?

Lots of people struggle with this. But the truth is that it really depends on what your priorities are and the type of driving you do. Diesel engines are more powerful than petrol engines. They have a higher torque and so give a smoother drive. And they're more fuel-efficient than petrol, particularly out of town on long journeys. On the other hand, the harshness, noise, and vibrations in diesel driven cars are higher than that of a petrol-driven car. Also, the maintenance cost of diesel cars is greater. Petrol cars are generally quieter and cheaper to run on shorter journeys. Plug-in Hybrid Electric Vehicles (PHEV) meanwhile provide all-electric performance at lower speeds, and traditional combustion performance on longer journeys.

DIESEL ENGINES

TDV6

The Turbocharged diesel engine produces 190kW and 600Nm of torque, and is ideal for higher power and torque demand usage with exceptional driveability.

- The innovative parallel sequential twin turbochargers feature a ceramic ball bearing on the primary turbo to reduce friction for maximum throttle response.
- A switchable coolant pump and two-stage oil pump are used for enhanced thermal energy management.
- The piezo common rail fuel injection system enables precise control of the amount of fuel injected, creating a uniform mixture for more efficient combustion.
- The engine utilises these technologies to offer premium refinement and performance.

SDV6

The 3.0 litre V6 Twin Turbocharged Diesel engine produces 225kW and 700Nm of torque and is ideal for higher power and torque demand usage with exceptional driveability.

- The innovative parallel sequential twin turbochargers - a concept pioneered by Jaguar Land Rover - feature a ceramic ball bearing on the primary turbo to reduce friction for maximum throttle response.
- A switchable coolant pump and two-stage oil pump are used for optimal thermal energy management, improving operating efficiency.
- The piezo common rail fuel injection system enables precise control of the amount of fuel injected, creating a uniform mixture for more efficient combustion and less emissions.
- The engine utilises these technologies to offer premium refinement and performance.

SDV8

The 4.4 litre V8 Twin Turbocharged Diesel offers top-of-the-range performance with 250kW and a staggering 740Nm of torque between 1,750-2,250rpm.

- Helical and tangential inlet ports for low-speed swirl and high gas flow, with combustion chambers optimised for emissions performance.
- 2000 bar common rail fuel injection with Gen 3 Piezo injectors.
- Compounded Graphite Iron block with optimised thin wall section and aluminium alloy heads.
- Twin overhead camshafts and four valves per cylinder.

PETROL ENGINES

Si4

The high-performance Ingenium 221kW, 400Nm 2.0 litre 4-cylinder Turbocharged Petrol engine features upgrades to the boosting system.

- Delivering a peak torque of 400Nm between 1,500-4,000rpm.
- The uprated turbocharger features a high-flow compressor wheel delivering 26 percent more air, enabling a peak power output of 221kW
- The twin-scroll turbocharger features ceramic ball bearings, which reduces friction and improves transient response.

P360/P400

The 3.0 litre Ingenium inline 6-cylinder Petrol engine is available in two power outputs. It produces 265kW and 400Nm of torque, or 294kW and 550Nm of torque.

The combination of MHEV technology and a range of efficiency measures deliver an engine of superb performance and driveability, while producing impressively low CO₂ emissions.

- Mild Hybrid Electric Vehicle (MHEV) technology utilises a belt-driven integrated starter generator, a 48V lithium-ion battery and an electric supercharger for driveability, economy and refined Stop/Start operation.
- The twin-scroll Turbocharger in addition to the electric Supercharger delivers additional engine boost at higher engine speeds and seamless power delivery.
- Variable cam timing on both the intake and exhaust camshafts allows the nominal cam profile to be advanced or slowed for optimum combustion. Combined with Continuous Variable Valve Lift, this delivers class-leading levels of flexibility and control over engine breathing to maximise efficiency at every operating condition, enhancing both performance and fuel economy.

V8 SUPERCHARGED 386KW

With 386kW and 625Nm of torque the 5.0 litre V8 Supercharged Petrol engine provides stunning performance for ultimate dynamism and driver engagement.

- The V8 has a compact and lightweight all-aluminium design, with impressively low levels of internal friction.
- The engine has been optimised around a state-of-the-art Bosch engine management system. This features high-pressure direct injection with a centrally mounted, multi-hole, spray guided injection system.
- Fitted with a sixth generation, Twin Vortex System (TVS) supercharger, the engine offers superior thermodynamic efficiency and extremely refined noise levels. The supercharger fully utilises the additional capacity of the 5.0 litre engine, generating a torque profile that delivers outstanding levels of power in a linear and engaging manner.
- The result is an impressively powerful yet refined drivetrain that delivers on both sporting excitement and luxurious refinement whenever required.

V8 SUPERCHARGED 423KW

Exclusive to SVR the 5.0 litre Supercharged V8 Petrol engine has been uprated to deliver 423kW and 700Nm of torque. This is enabled by a recalibration of the engine and its management system to increase maximum available boost pressure. Maximum torque is delivered at 3,500-5,000rpm.

Refer to V8 Supercharged Petrol engine for full details.

CHOOSE YOUR EXTERIOR

SELECT YOUR ROOF

Choose from a metal roof, or a fixed panoramic or sliding panoramic roof – both of which enhance the sense of space in the vehicle's interior and flood it with natural light. The fixed panoramic roof provides uninterrupted views of the surrounding environment. The sliding panoramic roof opens fully to let the outside in. You can select either a body-coloured or contrast roof in Narvik Black to further enhance your vehicle's exterior. Metal and panoramic roofs available with all colour finishes.

SELECT YOUR RANGE ROVER SPORT DESIGN PACK

You can tailor the exterior of your Range Rover Sport with the addition of any of the following packs: Black Design Pack, Bright Pack or Exterior Carbon Fibre Pack. Each one elevates the vehicle's sense of sophistication, with specific detailing providing another level of individuality.

BLACK EXTERIOR PACK

Optional pack on SE*, HSE*, and HSE with Dynamic Pack only

- Narvik Black bonnet and tailgate script
- Gloss Black main grille
- Narvik Black main grille surround
- Narvik Black bonnet vent inserts
- Narvik Black fender vent fingers
- Narvik Black mirror caps
- Black Sport badge.

*Not available with P300 engine on SE or HSE.

BRIGHT PACK

Optional pack on Autobiography with Dynamic Pack only

- Atlas Silver bonnet vents inserts
- Atlas Silver bonnet and tailgate script
- Shadow Atlas grille with Bright surround
- Atlas Silver door handle surrounds
- Atlas Silver fender vent fingers
- Gloss Black mirror caps (body-coloured if body-coloured roof is selected)
- Noble Silver tailgate appliqué
- Indus Silver rear bumper exhaust surround
- Atlas Silver Sport badge.

EXTERIOR CARBON FIBRE PACK

Retailer fit option

- Gloss Carbon Fibre bonnet vent inserts
- Gloss Carbon Fibre grille surround
- Gloss Carbon Fibre fender vent surround
- Gloss Carbon Fibre mirror caps
- Gloss Carbon Fibre tailgate finisher.

Retailer-fit options can be fitted following the point of order or at any stage during the ownership period.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

SELECT YOUR SVR PACK

The SVR Carbon Fibre Pack provides a superb enhancement to the Range Rover Sport SVR's undoubted sporty look. It is available in all exterior paint options and includes a Gloss finish Carbon Fibre grille surround, lower bumper intake surrounds, fender vent surrounds, mirror covers and tailgate finisher, with the additional option of an exposed Gloss finish Carbon Fibre bonnet (centre section only).

SVR (STANDARD)

- Body-coloured lower bumper intake surrounds
- Narvik Black main grille surround
- Narvik Black fender vent surround
- Narvik Black mirror covers
- Narvik Black tailgate finisher.

SVR CARBON FIBRE PACK*

- Gloss finish Carbon Fibre lower bumper intake surrounds
- Gloss finish Carbon Fibre main grille surround
- Gloss finish Carbon Fibre fender vent surround
- Gloss finish Carbon Fibre mirror covers
- Gloss finish Carbon Fibre tailgate finisher.

SVR CARBON FIBRE PACK WITH EXPOSED BONNET*

- Exposed Gloss finish Carbon Fibre bonnet (centre section only)
- Gloss finish Carbon Fibre lower bumper intake surrounds
- Gloss finish Carbon Fibre main grille surround
- Gloss finish Carbon Fibre fender vent surround
- Gloss finish Carbon Fibre mirror covers
- Gloss finish Carbon Fibre tailgate finisher.

*Requires optional Carbon Fibre bonnet as shown.

Deployable side steps

These smart, practical steps make it easier to get in and out of the vehicle. Neatly stowed under the sills, the side steps automatically deploy as soon as the door is opened, or when activated by the key fob. The side steps are sensitive to obstructions and will not deploy in off-road or low-range settings. Featuring a stainless steel finish with laser etched Range Rover branding.

Fixed side steps

Complete with a rubber tread mat and brushed stainless steel trim, the fixed side steps provide easy access/exit to the vehicle's cabin and aid access to the roof. With embossed Range Rover branding, exterior Bright work and Bright anodised aluminium edge trim finish.

Rubber mats - LHD

Rubber footwell mats for front and second row occupants helps provide protection from general dirt. Featuring Bright accent Range Rover ingot and durable metal corner pieces.

Loadspace rubber mat

Range Rover branded waterproof rubber mat with retaining lip, helps protect the rear loadspace carpet from general dirt.

Click and Go System

The Click and Go range is a multi-purpose seat-back system for second row passengers. The versatile Click and Go Base fixes between the headrest mountings and further attachments can be added to hold tablets, bags and shirts, or jackets. Each attachment is sold separately. The base can be easily removed when not in use.

Deployable side step

SPORTING

Tow Bar Mounted Bike Carrier

The Tow Bar Mounted Bike Carrier features a one hand, quick attach/release tow bar coupling mechanism and can be tilted away from the vehicle, by use of a foot pedal, to allow easy access into the rear tailgate. Maximum load capacity 40kg for two bikes and 51kg for three bikes.

Sports roof box

The sleek, aerodynamically designed sports roof box with a Gloss Black finish can be mounted on either side of the vehicle for kerbside opening, and is lockable for security.

Sports roof box ski/snowboard inserts

Featuring an optional internal retention system for skis or other long loads.

Roof Mounted Bike Carrier

Roof Mounted, lockable Bike Carrier designed for holding a single bike, up to 20kg.

Aqua Sports Carrier

Carries a sailboard, canoe or kayak. Includes lockable multi-purpose holder to carry oars or paddles. Tilts to facilitate easy loading/unloading. Features lockable straps and rubber supports to maintain optimum weight distribution whilst protecting the kayak and vehicle from scratches/scuffs. Maximum load capacity 45kg.

Ski/Snowboard Carrier

Carries four pairs of skis or two snowboards, incorporates slider rails for easy loading and is lockable for security. Maximum payload 36kg.

Roof Mounted Bike Carrier

OUTDOOR

Tailgate Event Seating in Ebony leather

The Tailgate Event Seating is handcrafted from beautiful Ebony Windsor leather, with a highly durable aluminium frame. Stowed in the loadspace, these seats can be quickly and easily fitted to provide comfortable seating for two adults on the lower tailgate, when the vehicle is stationary.

Mudflaps

Mudflaps are a popular upgrade for reducing spray and ensuring paintwork is protected from debris and dirt. Designed to complement the vehicle's exterior styling.

Centre armrest cooler/warmer box

Food and drinks cooler and warmer that acts as a rear centre armrest. With a leather-covered top, it is held in place by the centre seat belt and powered from the rear auxiliary socket. Ideal for long journeys with the family.

Roof rails

Roof rails facilitate easy fitment of cross bars for roof carrying. Preset positioning points ensure cross bars are fixed in the optimum position for weight distribution and dynamics.

Cross bars

Elegant, durable Bright finish aluminium cross bars, with T-track design providing space to mount multiple accessories by utilising the full length of the bars. Aerodynamic profile minimises drag and wind noise. The incremental height when fitted is 93mm.

Tailgate Event Seating in Ebony leather

TOURING

Public charging cable

The public charging cable provides an upgrade from the standard home charging cable, helping to reduce the time required for charging. The six metre long, public cable can be used with a universal style A/C wall box (which does not feature a tethered cable), to provide a fast charging solution at home. Alternatively it is compatible with public charging points.

iPhone Connect and Charge Dock

The iPhone Connect and Charge Dock has been designed to charge utilising the cup holder space in the central console. When connected, the iPhone's media is accessible and has the ability to be controlled via the integrated infotainment/audio system. The 'cut-out' design of the holder is such that the home button is also accessible for use when parked.

Wireless Phone Charging Cup Holder

The Wireless Phone Charging Cup Holder has been designed to charge utilising the cup holder space in the centre console. The holder will accommodate varying phone sizes securely in place. The charger displays an LED light to indicate when charging, and turns off when complete. Fits phones up to 72mm wide.

iPhone Connect and Charge Dock

PET PRODUCTS

Pet Transportation Pack

Convenient option to provide a comfortable environment for transporting pets, which can be fitted or removed quickly as and when required. Foldable Pet Carrier, Spill Resistant Pet Bowl and Loadspace Rubber Mat. The perfect solution for owners who regularly carry dogs or other pets in the loadspace area of their vehicle.

Pet Care and Access Pack

Taking the effort out of transporting pets, this option ensures everything required is to hand to transport pets in comfort. Combines the full height luggage partition, quilted loadspace liner*, Pet Access Ramp and portable rinse system. The perfect solution for owners who regularly carry dogs or other pets in the loadspace area of their vehicle.

Pet Loadspace Protection Pack

Designed to provide protection and easy cleaning of the loadspace from wet and muddy paws. Combines the quilted loadspace liner*, full height luggage partition and Spill Resistant Pet Bowl. The perfect solution for owners who regularly carry dogs or other pets in the loadspace area of their vehicle.

Quilted loadspace liner*

This tailored liner covers and protects all the carpeted areas of the loadspace area including the floor, second row seat backs and loadspace side walls. Manufactured from a soft quilted fabric, with an integral rubber mat and detachable bumper protector it is easy to wipe clean, making it ideal for owners who regularly carry dogs or other pets in the loadspace area of their vehicle.

Pet Transportation Pack

*Not available with P400e.

THE WORLD OF LAND ROVER

Your Land Rover has been designed and engineered to help you make more of your world. It can take you to places other vehicles simply can't reach, in a style that cannot be matched. To celebrate the Land Rover lifestyle, we've put together a range of experiences, publications and the Land Rover Lifestyle Collection. There's a world to explore. Get out there and enjoy it.

EXPERIENCE DRIVES

Bring out your adventurous side and experience Land Rover's legendary capability for yourself. Under the expert guidance of a world-class instructor, head to the most exciting and challenging off-road terrains and take the vehicle to its limits.

landrover.co.za/experience

ADVENTURE TRAVEL

From the sheer exhilaration of the Arctic ice to the awe-inspiring dunes of Namibia, Land Rover Adventure Travel offers you once-in-a-lifetime experiences that bring the spirit and emotion of our vehicles to life.

YOUR PEACE OF MIND

CUSTOMER SERVICE

When you bring your Land Rover to us, we use cutting-edge diagnostic equipment to assess all your vehicle's mechanical and electronic systems. Our qualified Technicians use tools specifically designed for our vehicles and only fit genuine Land Rover parts and Gear accessories. A choice of service plans are available which, together with Roadside Assistance, ensures complete peace of mind.

For further details contact your local Land Rover Retailer or search 'Land Rover Ownership'.

LAND ROVER ROADSIDE ASSISTANCE

Land Rover Assistance provides assistance in motoring emergencies, from immobilisation due to breakdown or accident, to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, wherever you happen to be.

For further details contact your local Land Rover Retailer or search 'Land Rover Finance'.

IMPORTANT NOTICE: Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles, parts and accessories and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications or availability, nor does it constitute an offer for the sale of any particular vehicle, part or accessory. Distributors and Retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

Images are for illustrative purposes only. Colours reproduced on-screen may vary compared to actual finish. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Retailer. Distributors and Retailers are not agents of Jaguar Land Rover Limited and have absolutely no authority to bind Jaguar Land Rover Limited to any express or implied undertaking or representation.
