# WELCOME BACK, ATTITUDE.

**Everything within reach:** the control panels are ergonomically optimised to keep your attention on the road ahead.

### Automatic cruise control<sup>1</sup>.

<sup>1</sup> Optional with 1.6 Turbo D automatic transmission on all models. Standard on Ultimate. <sup>2</sup> Optional on SC, SRI and Elite models. Standard on Ultimate. <sup>3</sup> Standard on Elite and Ultimate. Optional on SRI models as part of the Safety Pack. Automatic Emergency Braking with Pedestrian Detection works automatically above 5 km/h and below 140 km/h. From 5 to 30 km/h the deceleration metric to reduce the impact speed of the collision is 0,9 g. From 30 to 140 km/h the system reduces the speed by a maximum of 50 km/h. Above this threshold, the driver needs to brake himself/herself to reduce the speed even further. Operational speed range of Automatic Emergency Braking with Pedestrian Detection depends on the detected obstacle (mobile obstacle: from 5 to 140 km/h; fixed obstacle: from 5 to 80 km/h; pedestrian: from 5 to 60 km/h). Opel driver assistance systems are intended to support the driver within the limitations intrinsic to the system. The driver remains responsible for the driving task. Safety Pack also includes: lane keep assist, forward collision alert, automatic collision imminent braking (above 30 km/h) and driver drowsiness alert.
