# INSTANT PLEASURE

WHEN YOU BRING THE NEW RENAULT SANDERO INTO YOUR FAMILY, PLEASURE COMES AS PART OF THE PACKAGE. ADMIRING GLANCES, SHARED SMILES...

Like attractive design? Need a spacious interior? Want modern technology in an all new attractive package? Look no further than the all new Renault Sandero.

The new Sandero is a modern and refined hatchback. Its elegant lines will instantly make you feel like climbing in. 15" Alloy wheels and an integrated roof spoiler complement the exterior's premium look. Inside the cabin you are greeted with a high quality interior featuring a leather steering wheel and gear lever, electric windows and mirrors and a host of creature comforts you would expect from a much more expensive vehicle. Standard with an integrated Radio/CD player system featuring Bluetooth®, USB, AUX connectivity and fingertip controls behind the steering wheel. Perfect for making safe hands-free calls and streaming music on the move.

# STEPWAY

## OF LIFE

A LITTLE DARING, A LITTLE BIT OF FANTASY... THE NEW SANDERO STEPWAY ADDS SOME SPICE TO LIFE WITH ITS ASSERTIVE FRONT GRILLE, ITS ELEVATED GROUND CLEARANCE, ITS ROOF BARS AND ITS EXCLUSIVE DECALS.

Open up to adventure: whether your destination is a getaway break or a night out, you'll find the tone to suit your mood. With all creature comforts thrown in, this is a genuine luxury city car. All the style of a Sports Utility Vehicle. All the practicality of a family hatchback. Enjoy the best of both worlds with the new Sandero Stepway.

Its raised ride height gives you a commanding view of the road ahead. Its black wheelarch extensions, side sills and front and rear scuff plates make it every inch a robust Crossover. Yet there's a suave and sophisticated side to those rugged good looks: 16" 'Stepway' design wheels, satin chrome roof bars and a choice of four optional stunning metallic colours give Sandero Stepway an assured presence about town.

# RENAULT'S 66KW TURBO ENGINE

MANY MANUFACTURERS ARE REDUCING ENGINE CAPACITY AND NUMBER OF CYLINDERS BY ADDING A BOOSTING DEVICE (TURBOCHARGER OR SUPERCHARGER). THEY PROVIDE A POWERFUL ENGINE WITH SIMILAR PERFORMANCE TO A MUCH LARGER ENGINE, BUT WITH MUCH IMPROVED EFFICIENCY AND REDUCED CARBON EMISSIONS.

## 3-CYLINDERS = 3 FOLD BENEFITS

1. Lower fuel consumption but performance maintained through the strategy of downsizing
2. Reduced weight friction (one cylinder less)
3. Naturally higher efficiency linked to this architecture

### DOWN IN SIZE BUT NOT DOWN IN POWER.

- Downsizing is a technique which involves reducing the cubic capacity of an engine in order to reduce fuel consumption, while maintaining performance thanks to turbocharging. The resulting saving in fuel consumption is estimated to be 5%.
- Removing a cylinder reduces friction by 20% compared with a 4-cylinder engine architecture of the same cubic capacity, leading to a 4% saving in fuel consumption.
- The 3-cylinder pulse, combined with a longer exhaust phase, is twice as powerful as that of an equivalent 4-cylinder engine.
- This natural turbocharging means that less demand is made of the turbo which in turn is more efficient, directly benefiting fuel consumption.

### F1 TECHNOLOGY TRANSFER.

- Turbo Technology was first introduced in F1 in 1977.
- High Tumble Strategy: optimised flow of the fuel mix inside the combustion chamber for fast, stable combustion; the air turns quicker in the chamber (twice on average) which allows a near instantaneous combustion.
- High Tech Surface Treatments: Camshaft tappets with DLC (Diamond Like Carbon) & Graphite-Coated Pistons are surface treatments used in F1 that significantly reduce friction and improve energy efficiency.

# OUR ABSOLUTE PRIORITY

## SAFETY FOR ALL

THE NEW SANDERO BOASTS AN ARRAY OF TECHNOLOGY TO MAKE LIFE SAFER. IT FEATURES HILL START ASSIST (HSA) FOR AN ULTIMATELY EFFORTLESS DRIVE. ANTI-LOCK BRAKES (ABS), ELECTRONIC STABILITY PROGRAMME (ESP) WITH EMERGENCY BRAKE ASSIST (EBA), 4 AIRBAGS (2 FRONT + 2 SIDE ON THE DYNAMIQUE & STEPWAY MODELS) AND 3-POINT REAR SEATBELT RESTRAINTS ENSURE SAFETY IS STANDARD.

### PREVENT

To anticipate risks and notify the driver under all circumstances

Designed to empower and inform the driver in real time, the technology developed by Renault allows you to drive more safely and with more peace of mind.

### CORRECT

Advanced technology that rewrites the rules

Renault has developed driver support systems that ensure responsiveness to all threats and thus help compensate for unforeseen road hazards and driving errors.

### PROTECT

All occupants of the vehicle as well as others using the road

Thanks to its expertise in accident research and new technology for all, Renault offers one of the safest ranges on the market. Our priority: to ensure maximum safety in an accident to save lives.

**1. Protection of vehicle occupants.** Standard with 4 airbags (2 front + 2 side) in Dynamique and Stepway versions standard with passenger airbag deactivation. **2. ABS** Anti-Lock Braking System with **EBD** Electronic Brake force Distribution, in conjunction with **EBA** Emergency Brake Assist: makes it possible to maintain control over the trajectory in the event of heavy braking. **3. ESP** Electronic Stability Programme (with ASR Anti-Skid Regulation and understeering control function). It ensures vehicle stability, especially under challenging road conditions. **4. Isofix system.** This makes for easier fitting of a child seat on rear bench and enhances its safety.

### PROMOTE AWARENESS AND ASSIST

For everyone's safety

Renault puts people at the heart of its strategy and has been involved in many social initiatives on the subject of road safety in schools and universities, for young people and international institutions. The brand is also committed to improving the efficiency of emergency services when deployed.

**DECADE OF ACTION FOR ROAD SAFETY 2011-2020**  
**SUPPORTED BY RENAULT**

### Renault safety in figures

- More than 600 people at the company work exclusively on vehicle safety.
- 100 million Euros are invested each year in safety research and development.
- 400 real crash tests and 4,000 digital simulations per year.
