DRIVING PLEASURE THAT ALWAYS FINDS AN OPEN ROAD

Whether it's the manual transmission or the automatic variant of the Ciaz, each has been designed to offer unparalleled ease of driving. Optimised gear ratios and smooth shift mechanisms not only enhance driving dynamics but also enhance fuel-efficiency.

DYNAMIC PERFORMANCE, HIGH EFFICIENCY

K14B VVT PETROL ENGINE

The new generation K14B VVT engine delivers both dynamic performance and fuel-efficiency. It incorporates new cylinder head and piston design for better efficiency and the VVT system, which optimises intake valve timing for better performance. Paying special attention to reducing friction in engine components further enhances the fuel-efficiency. This also contributes to smooth running and reduced engine noise.

EVERYWHERE YOU GO, SAFETY GOES ALONG

The body of the Ciaz is built on Suzuki's Total Effective Control Technology (S-TECT) concept to offer exceptional protection to those inside the car. The benefits of structural analysis with Computer Aided Design technologies are complemented by effective use of the high tensile strength steel to make the body stronger and safer. Plus, features such as dual airbags, seatbelts with pretensioners and force limiters, ABS with EBD, fog lamps and rear window defogger further add to the safety of the passengers.
